HPV Self-sampling KITS

KIT 1.1

Contents *

*Available in single box or collective packaging.

KIT 2.1

Contents *

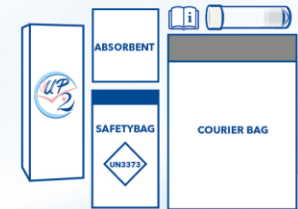

*Available in single box or collective packaging.

KIT 3.1

Contents

Inside KIT 1.1 box you will find:

- Vaginal Veil Collector **V-Veil UP2**
- Instructions for use
- 1 container for the storage and transport of samples.

Inside KIT 2.1 box you will find:

- 1 Vaginal Veil Collector **V-Veil UP2**
- Instructions for use
- 1 container with fixative solution for the storage and transport of samples.

Inside KIT 3.1 box you will find:

- 1 Vaginal Veil Collector **V-Veil UP2**
- Instructions for use
- 1 container with fixative solution for the storage and transport of samples
- 1 non-woven absorbent sheet
- 1 safety bag UN3373
- 1 courier bag.

Important aspects

- ✓ CLASS I Medical Devices
- ✓ Registered in the European database on medical devices (EUDAMED).
- ✓ Produced in our EN ISO 13485:2016 certified facility.
- ✓ Our products are manufactured in an ISO 8 clean room.
- ✓ Registered in the National Agency of Medicines and Medical Devices of Romania.

Discover all our KITS

Commercial advantages

- ✓ Suitable for all national **cervical cancer detection campaigns**.
- ✓ Very practical for NGOs that organize HPV screening campaigns, **especially in Muslim communities**.
- ✓ Suitable for laboratories that want to have the best product and save money.
- ✓ The only **self-sampling veil covered by scientific studies that show such good results, with or without a doctor or nurse**.
- ✓ The only kits on the market with the **V-Veil UP2** veil and transport liquid.

Self-sampling veil advantages

- ✓ Specially adapted to women who feel discomfort during gynecological examinations, that may **also be related to cultural or religious values**.

- ✓ **97.1% acceptance rate on a panel of 253 women.**
- ✓ The use of this veil makes it possible to **almost double the detection capacity of oncogenic high-risk papillomaviruses (HPV-HR)** by multiplex PCR in real time compared to a standard swab taken by a gynecologist or a nurse. With the **V-Veil UP2** veil it is possible to detect oncogenic **HPV-HR more than 12 times in 1 woman out of 8.**

Discover all our scientific studies

- ✓ The **V-Veil UP2** is simple, safe, and respects the privacy of all women.

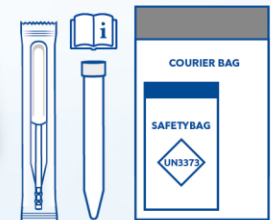

Transport liquid advantages

- ✓ The fixing solution for storage and transport is made in France.
- ✓ The collected secretion inside the liquid has a **shelf life of 83 days outside the refrigerator**.
- ✓ The fixing solution contains only water, 30% Ethanol, salts and a biocide for the user's safety and contains **NO methanol, NO formaldehyde**.
- ✓ The transport fluid is validated and used by the major leaders in Cytology and HPV.

KIT 4.1

Contents

Inside KIT 4.1 box you will find:

- 1 Vaginal Veil Collector **V-Veil UP2**
- Instructions for use
- 1 container for the storage and transport of samples
- 1 safety bag UN3373
- 1 courier bag.
